THE SUPERIOR COLLEGE, LAHORE

3<sup>rd</sup> PROFESSIONAL MBBS  
ANNUAL EXAMINATION 2016

Pathology

(SEQs)

infiltrative tumor

Snake like long and highly anaplastic

Roll No. 13135

Time Allowed: 2 hours

Total Marks: 75

Instructions

- The SEQ's part is to be submitted within 2 hours, extra time will not be given.
- Neat hand writing, use of margin and marker for headlines will increase the presentation of your paper.
- Do not write your name or disclose your identity in anyway.

Screening tests could be done in form of CT / MRI / X Ray  
Levels of alpha Fetoprotein may be raised

- Q1. a) Give the histologic classification of malignant epithelial lung tumors. 714 (2)  
b) Describe morphology & clinical course of adenocarcinoma of lung. (3)  
c) Describe the pathogenesis & lab findings of hepatocellular carcinoma. Labs include? Pathway and (2+3) 116
- Q2. Write down etiology, pathogenesis, morphology & lab findings of infective endocarditis. 559 (1+1+1+2)
- Q3. A middle aged woman presented with shortness of breath. She has decreased breath sounds & hyper resonant lung fields. Her X-Ray chest revealed increased lucency in all lung fields.  
a) What is the most likely diagnosis? Emphysema 675 other, Dyspnea cough (1)  
b) Describe pathogenesis & morphology of this disease. Barrel chest Pursed lips Pink Puffers (2+2)
- Q4. Write short notes on following:  
a) Sarcoidosis. 693 Systemic granulomatous disease may involve diff tissues. Nonnecrotizing granulomas (3)  
b) Nosocomial pneumonia. (Hospital acquired) 707 Staph A, Staph Pn, Pseudomonas, Enterobacteriaceae. asteroid bodies (2)  
c) Discuss the significance of liver function tests in acute viral hepatitis. lungs + lymph node common sites (5)
- Q5. Write down various risk factors, pathogenic mechanisms & clinical features of gall stones. (1+2+2)
- Q6. Enlist major primary glomerulonephritides. Explain pathogenesis, & microscopic findings of chronic glomerulonephritis. 900 (1+2+2)
- Q7. Classify testicular tumors. Write pathogenesis & morphological features of seminoma. 975, 976 (1+2+2)
- Q8. Write down etiology, morphology & grading/ staging of adenocarcinoma prostate. 983 Gritty/ Firm well defined (1+2+2) Penetrating invasion
- Q9. Write down pathogenesis & clinical findings of ulcerative colitis. 800 (3+2) α-methy Coenz
- Q10. Describe etiology, pathogenesis & morphology of acute proliferative glomerulonephritis. 909 (1+2+2) → AMACR
- Q11. Classify breast tumours. Describe morphology of infiltrating ductal carcinoma breast. 1062 (2+3) Precursor lesion are Prostate Intraepith Neoplasia
- Q12. Write down comparison between squamous cell carcinoma & basal cell carcinoma in tabulated form. (5)
- Q13. Classify bone tumors. Write down pathogenesis & morphology of osteosarcoma. (1+2+2)
